

## V-Twin Mfg. Shifter Kit

This is a custom application and should only be installed by a knowledgeable and trained motorcycle technician. V-Twin Mfg. accepts no responsibility for improper installation.

These installation instructions are for use with the following V-Twin Mfg. Shifter Kits. 22-0801, 22-0802, 22-1055 and 22-1015. Be sure to follow the specific instructions for your specific model.

Our Forward Shifter Control Kits are original FLH type shifter kits which allow the use of footpegs or floorboards. The units allow a 1 down and 3 or 4 up shifting pattern. The 22-0801 and 22-1055 kits include proper ratchet arm and dust cover. All other kits attach to existing components on stock shifter mechanism.

### Assembly Note: All Models

Step One – Attach shifter bracket #6 with the 3 3/8"-16x7/8" bolts, using lock washer to frame boss. Place anti vibration washer 1 (large) on inner shaft lever #7 and insert into shift bracket. Place #2 (small) fiber washer on shaft then install foot shifter.
