

V-Twin Mfg.
Sifton Motor Mount Limiters

Limiters fit 1982-94 FXR, 1999-2000 FXR 1980-2001 FLT/FLHT & 1995-2001 Buell models.
VT No. 31-0286

This is a custom application and rider safety depends on proper installation. This product should only be installed by a knowledgeable and trained motorcycle technician. V-Twin Mfg. accepts no responsibility for improper installation.

Limiters restrict the excessive movement of the engine in the motorcycle frame. It is especially useful for big inch motors.

Installation Instructions:

1. Place the motorcycle on a lift or stand and support the engine with a jack.
2. Remove top motor mount linkage and front motor mount linkage.
3. Loosen and remove the 3 bolts on the front engine bracket. Do not loosen or remove bolts holding down the rubber engine mount to the frame.
4. Be sure the motor is supported by the jack. You may have to raise or lower the engine with jack to remove the engine bracket.
5. Install the top (small) limiter with indent down over the rubber mount.
6. Reinstall front engine bolt with washer through engine bracket and top limiter.
7. Reinstall front engine mount bolts.
8. Install the bottom large limiter on the bottom of the rubber mount with indent up and then replace lower washer and nut.
9. Torque all bolts to factory spec.
10. Check rear belt for correct tension when done.
