

AGM Battery

- Ready to Install
- Completely Sealed
- Lock Bonded Plates
- SS Terminal Bolts
- Maintenance Free
- Exact fit

AGM Battery. The “Absorbed Glass Mat” Technology provides higher cold cranking amps, better rechargeability with longer overall life. Batteries are fully sealed for trouble free service in a black case. Available in OE or VT brand. **Note: 1998 and earlier FX models,** require battery side cover, VT No. 42-0770 and a top cover, VT No. 42-0785 for FXD models.

Note: AGM Batteries may require charging before installation.

Battery Hydro-meter is a great tester for cycle batteries because of its small size.

VT No. 16-0864

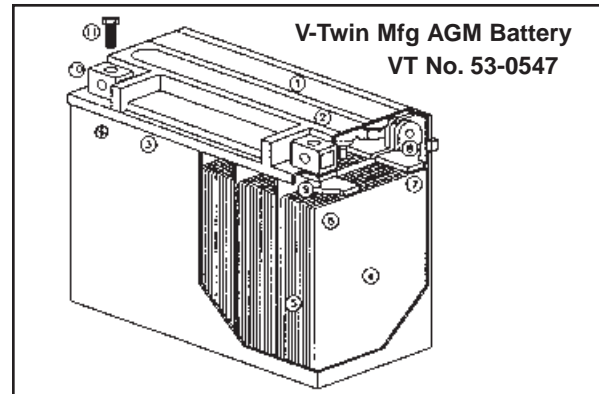

“Activator” Battery Filler attaches to any standard acid pack tube. Positive thumb release valve absolutely controls acid flow. No acid spills, burns or holes in clothing.

VT No. 16-0037

Battery Acid Catch Tank attaches to battery vent tube to collect excess acid to protect the frame and lower rear fender parts.

VT No. 16-1739

1. Unique vent system minimizes leakage.
2. Completely sealed maintenance free design eliminates acid spills and corrosion damage.
3. Bonded cover prevents electrolyte leakage and improves dependability.
4. Precise volume of demineralized electrolyte means no excess acid and improved life.
5. Positive AGM plate separators ensure long life and improved performance.
6. Durable AGM plates direct maximum cranking amps to terminals for quick starts.
7. Heavy top lead lugs provide improved adhesion to the plates for vibration resistance and long life.
8. Large diameter partition connections direct more power to the terminals.
9. Sturdy diameter bushings resist vibration damage and acid leakage which causes terminal corrosion.
10. Durable two position terminals.
11. Stainless steel terminal screws.

Battery Terminal Hardware Kit includes pieces to simplify battery installations on FXE and late XL models.
