

High Flow Air Cleaner Assembly

“Big Sucker” Air Filter Kits for Carbureted or Fuel Injected Twin Cam and EV2 Big Twin Models. The all-in-one backing plate features a built-in carb support and built-in breather tunnels at each head to decrease crankcase pressure. Each tunnel exits at the mouth of the carburetor to create a virtually closed loop system. No oil hoses, no oil fittings, and no leaking! Stage I kit features a High-Flow filter that accepts all 1993-up oval or round outer covers. Stage II kit features a 20% larger High Flow filter that requires an 8” 34-0548 or OEM outer cover. Both kits include a “Big Sucker” aluminum backing plate, high-flow air filter, 4 chrome banjo bolts for Twin Cam 88 and 1993-up EV2 Big Twin, simple instructions and all the necessary hardware.
