

## 31-2004 – Solid Motor Mount Kit

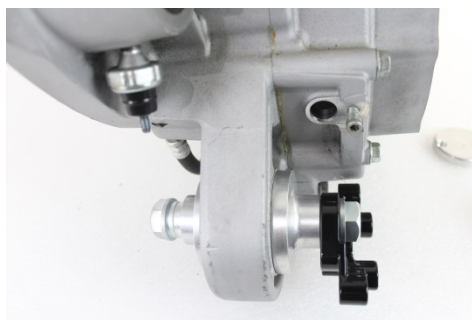

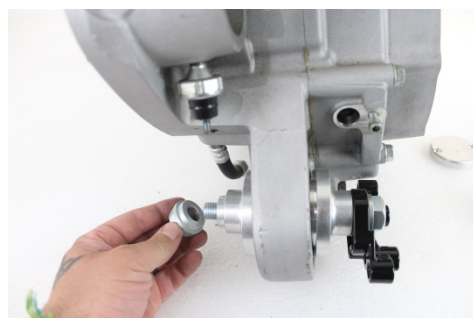

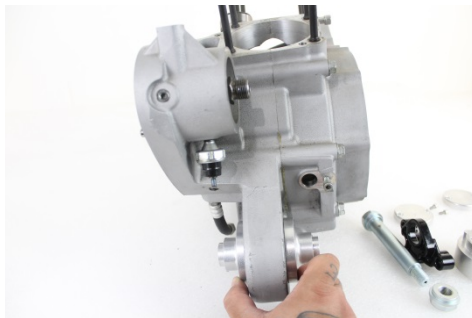

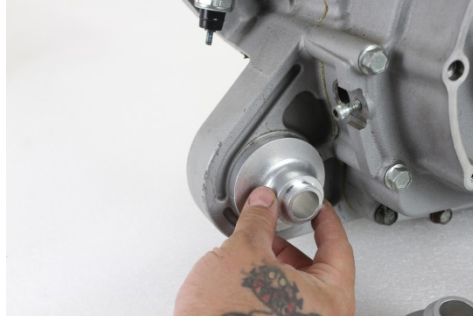

Solid motor mount kit for swingarm and hardtail frames, features a natural alloy construction and finish. Kit replaces stock ISO-rubber mounts from 2004-up Sportster models. This 6 piece set includes replacement motor mounts and 2 covers with hardware for the outside of the rear mounts. These mounts eliminate the shake while the motor is running. Great for hardtail applications to stop the rear chain slap!

**Step 1** – Remove existing front and rear motor mounts.

This kit only includes replacement motor mounts. You may require **31-0848** and **31-0849**.

**Step 2** – Attach front motor mounts as demonstrated below.

**Step 3** – Attach rear mounts as demonstrated below. Please note rear motor mount covers are only used for hardtail installations. The covers cannot be used on softtail installations.
