

## **VT No. 50-1200**

### **WARNING**

The rider's safety depends upon the correct installation of this kit. If the procedure is not within your capabilities or you do not have the correct tools, have a dealer perform the installation. Improper installation of this kit could result in death or serious injury.

### **REMOVE**

Remove the front fender. See the service manual.

If equipped, disconnect fender tip light wire at steering head.

Remove hardware that holds fender in place and remove fender.

### **INSTALL**

Install new fender using screws and flanged locknuts supplied in kit. See the service manual.

Install fender with the hem to the front and smooth inner surface toward the rear.

When tightening, verify that fender to tire clearance is the same in the front and rear.
